

e-Framework for Education and Research org (XN)

“The e-Framework is an initiative by the U.K's Joint Information Systems Committee (JISC), Australia's Department of Education, Science and Training (DEST) and partners to produce an evolving and sustainable, open standards based, service oriented technical framework to support the education and research communities.

“The e-Framework supports a service oriented approach to developing and delivering education, research and management information systems. Such an approach maximises the flexibility and cost effectiveness with which systems can be deployed, both in an institutional context, nationally and internationally.
