Subject: Request for Permission to Reproduce Rational Software Documents

Mr. Farmer,

After review by our business units and IP attorney, it appears that there is no problem for you to reproduce the documents. With that, I will prepare the Permission agreement to document this matter. Please provide your complete contact info -- company name, address, phone and/or fax.

Thanks,

Meriam L. Dancel

Please respond to jxf

In early April you assisted me in obtaining permission to reproduce some IBM documents for a DVD supplied to higher education software developers, primarily those participating in JA-SIG (www.ja-sig.org).

The group is now considering implementation of the Rational Unified Process, developed by Rational Software, Inc. before it was acquired by IBM Corporation. We would like to have permission to reproduce the following documents:

Rational published a white paper "Rational Unified Process Best Practices Development Teams" revised November 2001. It is available from

10/10/2003

www.rational.com/media/whitepapers/rup_bestpractices.pdf. It can be downloaded from www.rational.com/products/whitepapers/100420.jsp?SMSESSION=NO. (The site reads that IBM Corporation now holds the copyright).

There were two articles published in The Rational Edge that would be useful. "What Is the Rational Unified Process?" by Philippe Kruchten was found at www.therationaledge.com/content/jan_01/f_rup_pk.html and "Delivering packaged application solutions with Rational Unified Process" by Dennis Moya was found at www.therationaledge.com/content/aug_03/t_packagedapp_dm.jsp.

In addition, I found a useful article "Activity Diagrams: What They Are and How to Use Them" by Maria Ericsson was found at www.therationaledge.com/content/jan_02/t_activityDiagrams_me.html.

Thank you for assisting us.

Dear Mr. Farmer: The COBOL portion of your request has been approved, provided IBM is not obligated to provide Instructional Media + Magic with any materials. You will obtain any required materials from the internet. We suggest that Instructional Media + Magic use the most recent editions of the requested publications.

I will continue to follow-up with the WEBSHERE portion of your request - and send you a consolidated response. Thank you.

Thanks. I am sure the delay was not in your office. I understand large organizations.

Subject: Request for Permission to Copy

On August 30th, I requested permission to copy the following documents:

1. COBOL for OS/390 & VM Language Reference, September 2000, 5th Ed, SC26-9046-04
2. COBOL for OS/390 & VM Programming Guide, September 2000, Version 2, Release 2 SC26-9049-05
3. Portlet Development Guide: Introduction to the Portlet API, First Edition, October 25, 2001
4. IBM WebSphere Portal Server Product Architecture V2.1, November 19, 2001 Web Services
5. Web Services for Remote Portals (WSRP) Note 21, January 2002
6. (WSXL) Web Services Experience Language, Version 2, IBM Note April 10, 2002

On September 6th in our last exchange about the citations for each of the documents, I wrote:

"Apparently a new edition, Edition 1.1, has become available. The URL
[http://www-3.ibm.com/software/webservers/portal/library/PortletDevelopmentGu](http://www-3.ibm.com/software/webservers/portal/library/PortletDevelopmentGuide.pdf)

ide.pdf

This edition is dated January 30, 2002. I have a copy of this edition and we would prefer to use this one to the earlier one."

So far I have not received a response from IBM. The fifth item, "Web Services for Remote Portals (WSRP) was superseded on September 30th by IBM's contribution of Thomas Schaek's WSRP specification to OASIS; OASIS has a policy that permits copy (but not changing) a document.

Perhaps you could tell me when a response from IBM may be possible. In our meetings and presentations I refuse to use IBM materials such as those above since it appears copying or excerpting them would violate your copyright policy. For your information (which you can share with others), Microsoft has always provided written permission within 48 hours from the submitted request.
