Alignment

## Alignment

- Architecture
- Metamodel
- Methodology/Process
- Content

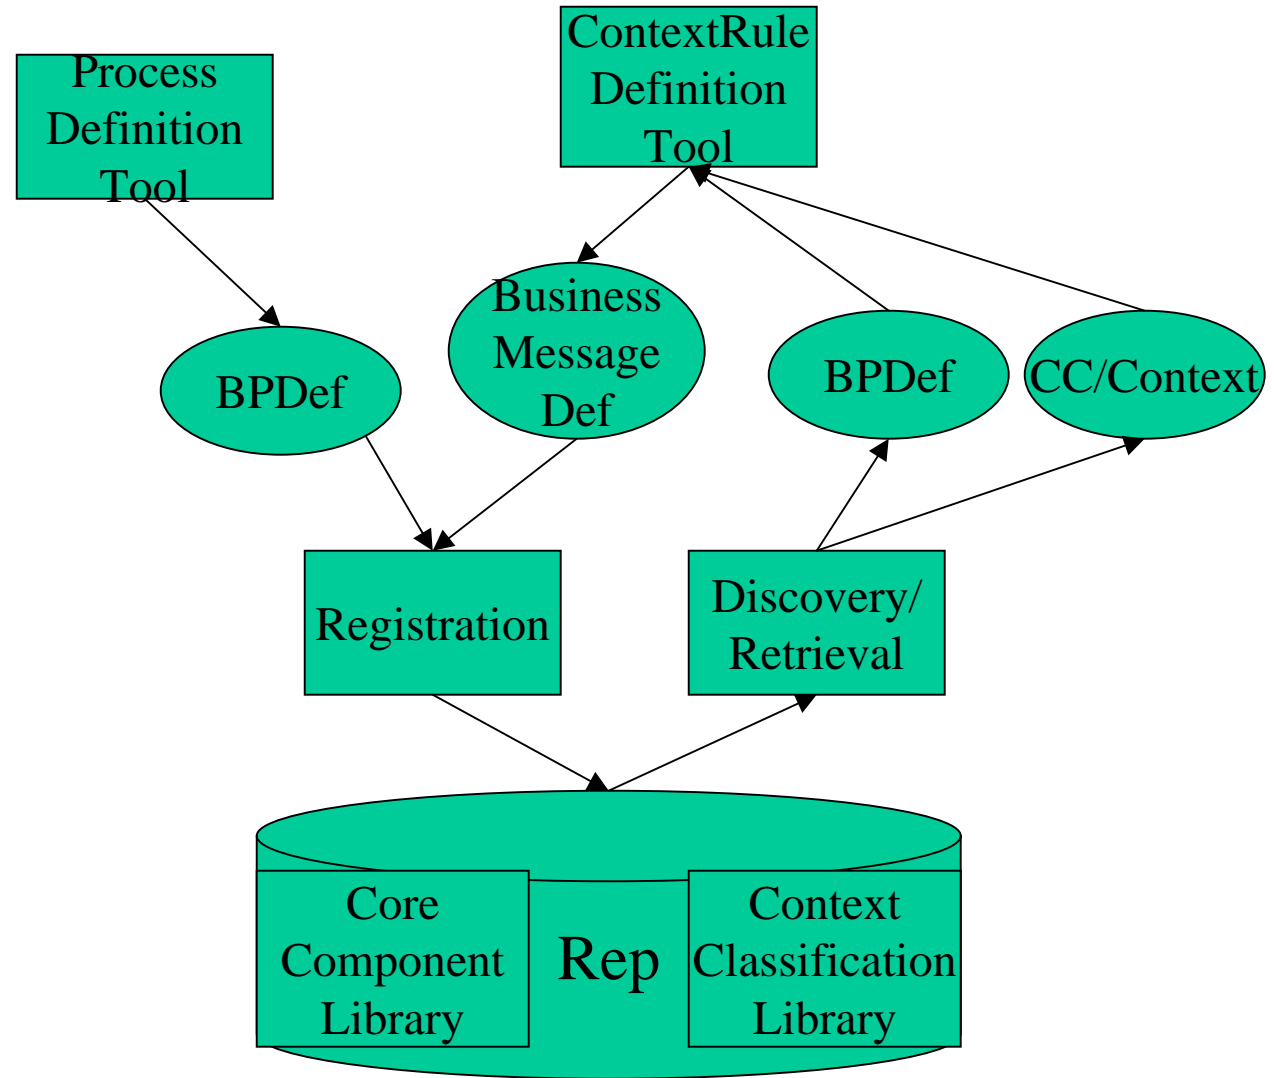

Creating A Single Global Electronic Market

# Process & Information Specification

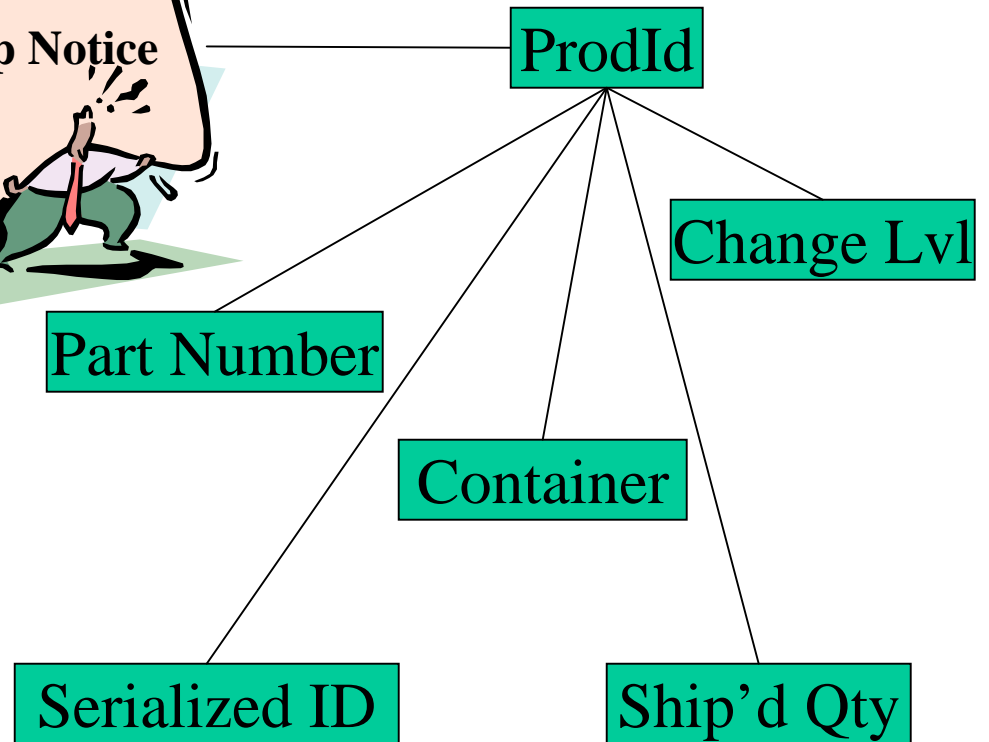

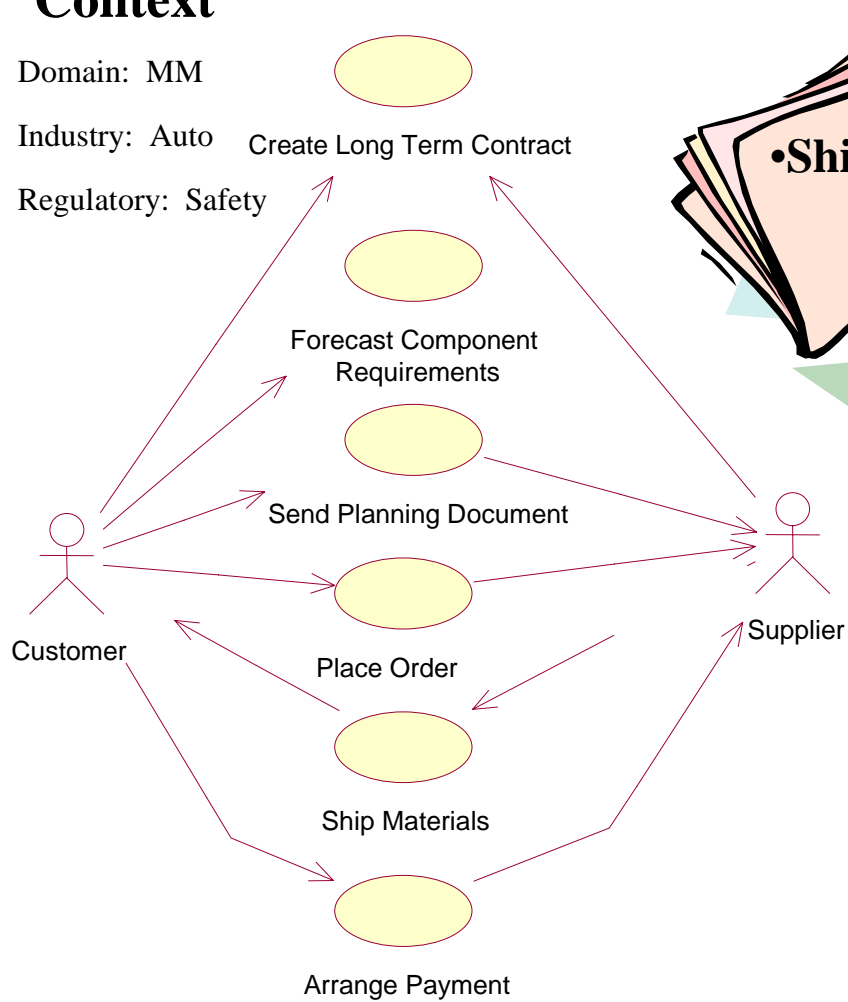

## Context

Domain: MM

Industry: Auto

Regulatory: Safety

# Implementation Specification

## Summary

- BP, CC, and TPP fit in one coherent architecture
- BP, CC, and TPP fit in one coherent metamodel
- There is one process that leads to the definition of BP and Message specification – built on CC's and Context
- This specification is the 'Functional Spec' for a TPP
- Merged with technical spec, the TPP becomes the spec/properties for the Business Service Interface
- We will demo this in Tokyo

Creating A Single Global Electronic Market

## Marketing Team

Creating A Single Global Electronic Market

## This week

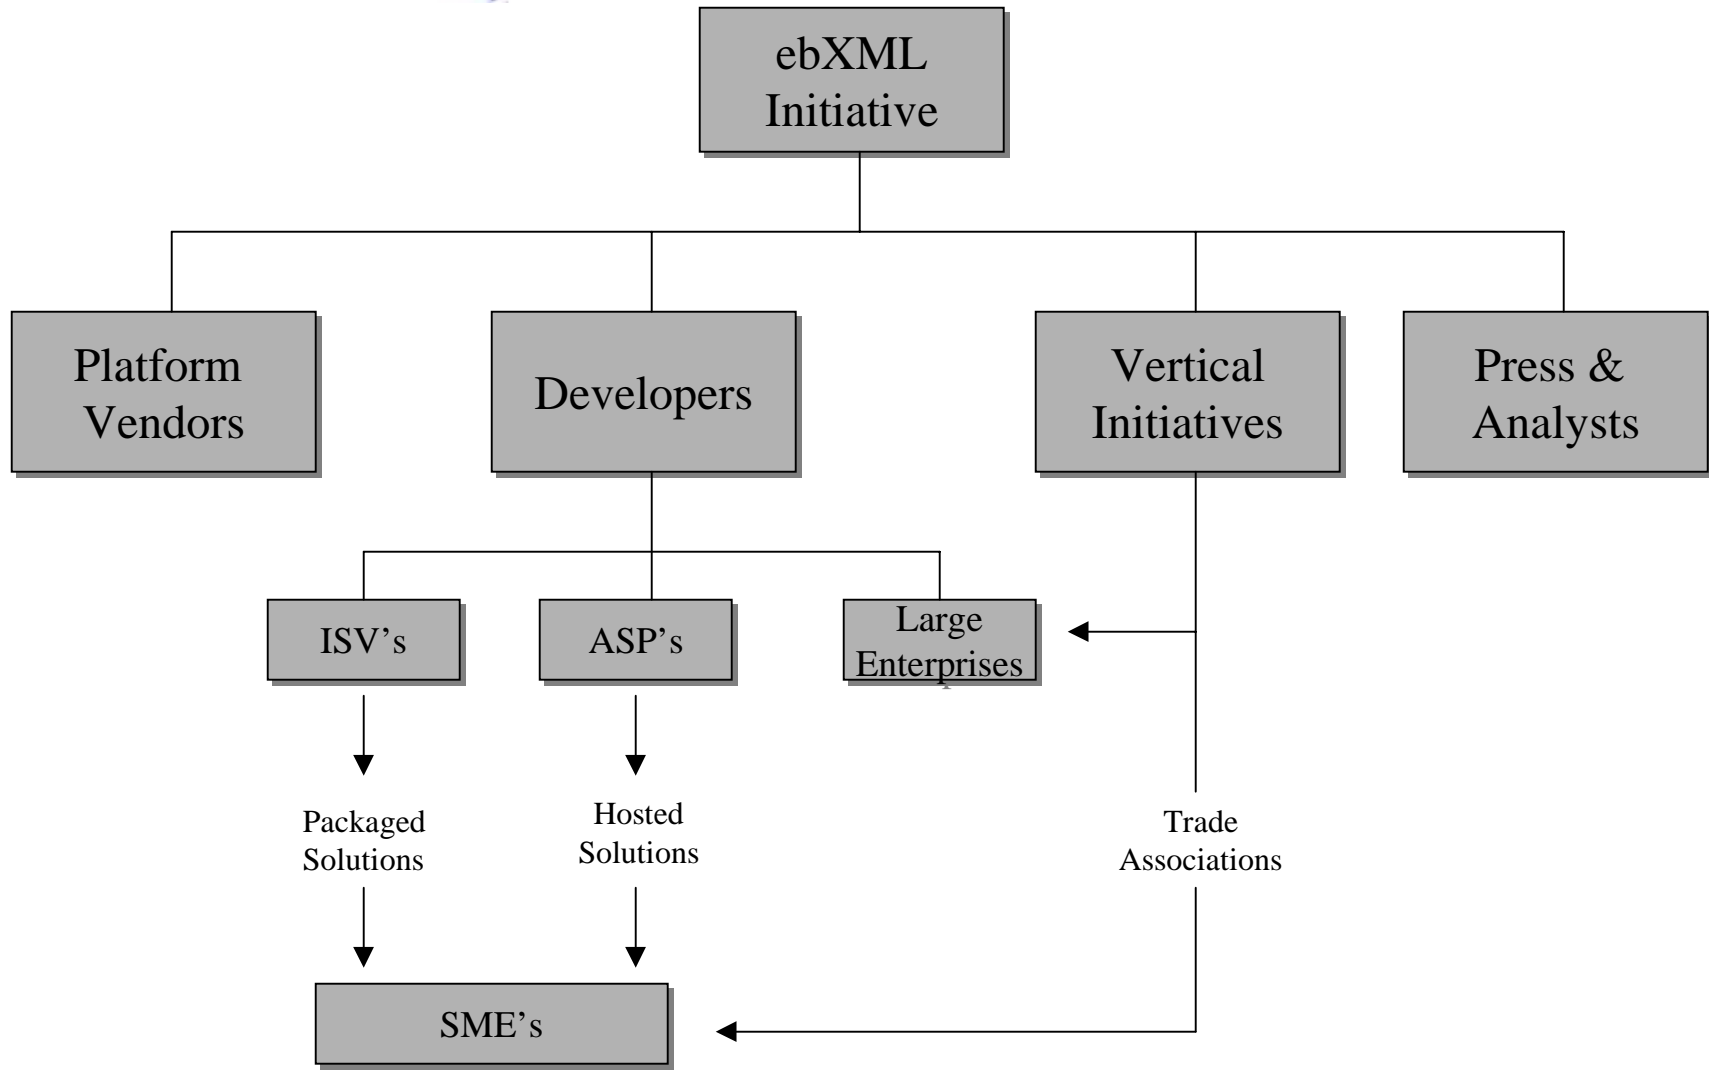

- **Focus now on delivery**
- **Established priorities and agenda**
  - *Now - Tokyo*
- **Increase:**
  - *activity*
  - *visibility*
  - *participation*
  - *adoption*

# ebXML Marketing Audience

Creating A Single Global Electronic Market

## Program Elements

1. ebXML Web Site
2. Media Tour
3. Outreach to verticals & associations
4. Trade Show Awareness
5. Collateral

## Project Management Team

Verbal Announcement Only!!!

Creating A Single Global Electronic Market

## Quality Review Team

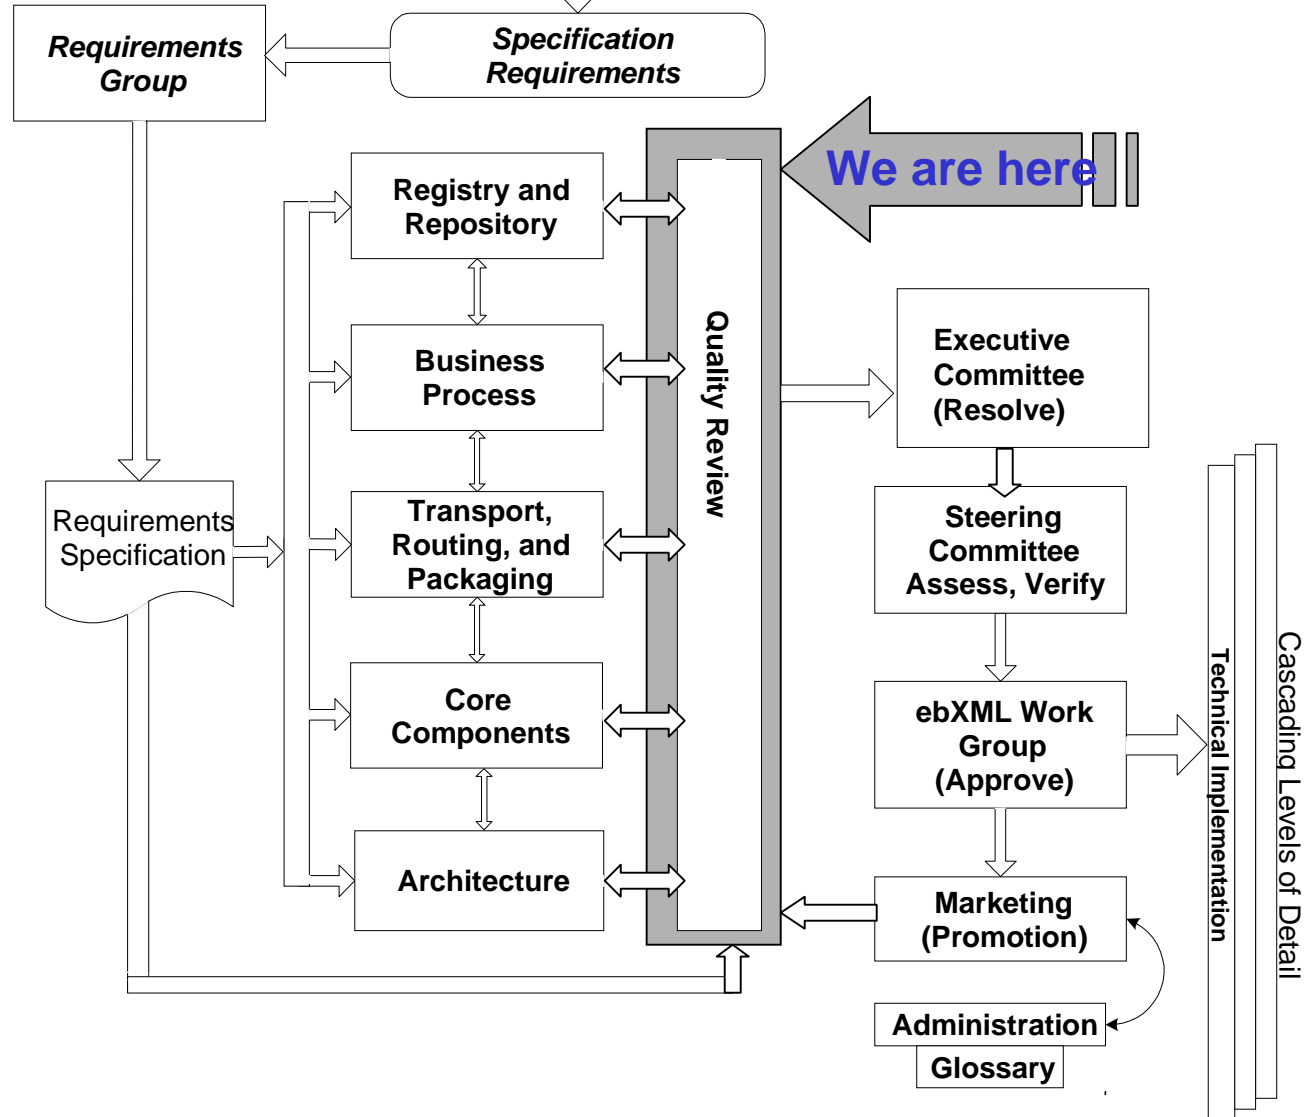

# Responsibilities

- Report to Executive
- Review Deliverables for Quality and Consistency
  - Deliverables include:
    - Technical Specifications
    - Public documents with technical content
    - Public presentations (inc. QTO)
    - Technical content on the ebXML website
  - Comments to Authors and cc: to Executive
  - Involves ongoing monitoring of work groups

User Community Business and Technical Requirements

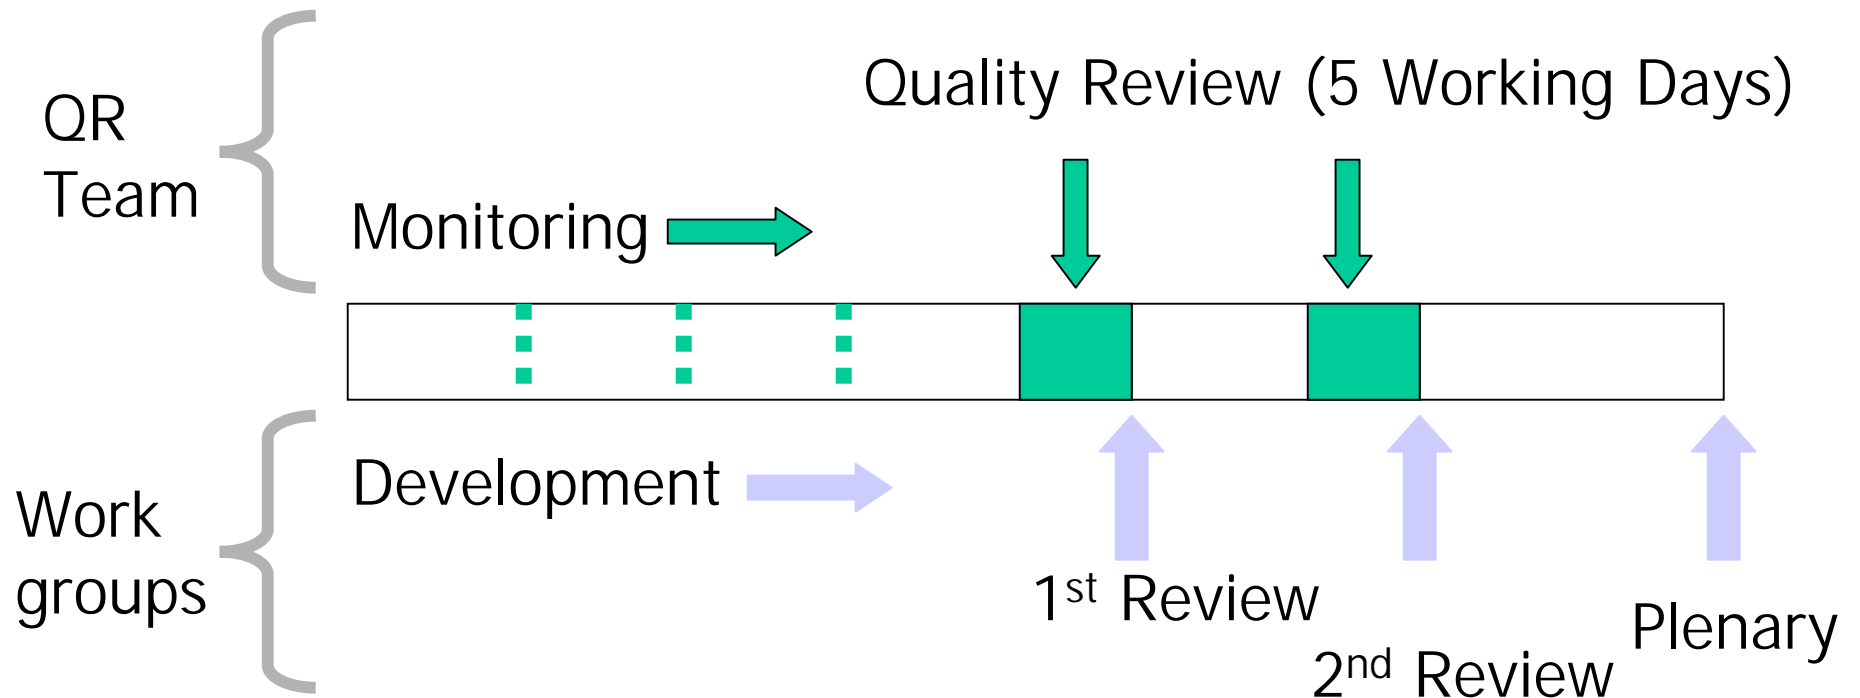

# Where we fit

Creating A Single Global Electronic Market

# Document Review Work Plan

## Current Work Plan

- Deliverables for Review
  - FAQ
- Submitting Deliverables
  - Steering Committee List
  - Subject: ‘For Review’
- Ongoing Work

## The Team...

- Dick Raman – Steering Committee
- Bob Glushko – C<sup>2</sup>+BP
- Tim McGrath – C<sup>2</sup>+BP
- Nagwa Abdelghfour – R<sup>2</sup> + TA
- Clive Darling – TRP
- Joseph Baran – TRP + PoC
- Tony Blazej – PoC + TPA

Creating A Single Global Electronic Market

# Architecture

## Status Report

- Specification update
  - Review of comments
  - IETF Template
  - Messaging services
  - Use Cases

## Status Report

- Transformation Design Rules
- Glossary of Terms
- Conformance Rules

## Plans for Tokyo

- Approved Specification
- Presentation on Conformance
- Glossary of Terms
- Draft Transformation Rules
- Security & Trust Proposal

# Business Process & Core Components

Joint Report

# BPCC Delivery Team

**BUSINESS  
PROCESS**

**CORE  
COMPONENTS**

- **Metamodel/Context**
- **Methodology/Patterns/Analysis**
- **Domains**

## Accomplishments

- Aligned existing related activities
- Created a work plan of deliverables.
- Developed representation class matrix
- Combined industry analysis results
- Launched a core process group

Creating A Single Global Electronic Market

## Next Steps

<b>Deliverable</b>	<b>When</b>
Matrix of Representation Classes	8/18/2000
Industry Analysis Results	8/31/2000
Registration Authority Procedures Document	Tokyo
Meta-model - third draft	9/30/2000
Core Component Context	Tokyo
Proof of Concept Proposal	9/15/2000
Integrate Core Component Methodology with Business Process Methodology	Tokyo
Align with outside methodologies	On going
Guidelines for applying methodology end to end	9/30/2000
Core Process Specification template	9/30/300
Catalog of Core Processes	Vancouver
Update methodology for describing core components	9/30/2000

## Proof-of-Concept

Verbal Announcement Only!!!

Creating A Single Global Electronic Market

## Registry & Repository

## **Project work completed this week**

- **Completed reviewing *Part 1: Business Domain* document comments and will send to Quality Assurance team**
- **Started work on *Part 2: e-Business Requirements* document on use cases for interaction between the users, registry and repository**
- **Discussed Technical Architecture document and requirements for registry and repository and changes needed to align with Part 1 document**
- **Met with new Delivery Team on project proposal for POC that uses registry and repository Part 2 specifications**

## **Project plans for next three Months**

- **Continue working on *Part 2: e-Business Requirements Document***
- **Regular scheduled Bi-Weekly conference calls to discuss progress of Part 2 Document**
- **Midway two day meeting to work on Part 2 Document**
- **Deliver feedback to TA team within the next week**
- **Continue to work on POC proposal with Delivery Team**

---

Creating A Single Global Electronic Market

# Requirements

## Work this week

- Completed work on Requirements Traceability Matrix
- Began requirements work on Trading Partner information, transitioned it into new TP Team
- Discussed revisions to Requirements Specification

## Plans for Interim

- Work within TP team on TP requirements
- Begin work on updates to Requirements Specification
- Research other requirements as identified

Creating A Single Global Electronic Market

Trading Partner

## Trading-Partner Project Team

### ● Mission

- Define a specification for creating the IT part of a partner profile and a TPA, which is a combination of two partner profiles

### ● TPA

- IT configuration file, specifies only things that TRP messaging service can manage and enforce
- No business information
- No business semantics except message names/schemas and sequencing rules
  - Derive from BP metamodel

## TP Work Plan and Deliverables

- Requirements review (3 weeks)
- Revise TPA UML model by mid-October
  - Deliverable for Tokyo
- Draft spec (work mostly in Tokyo)
  - complete around Dec. 1
- Approval at Vancouver

# Transport, Packaging & Routing

## Transport, Routing & Packaging

- Accomplished this week:
  - Name Change - Messaging Services
  - Combined Packaging and Header Specification into one and incorporated comments - 98%
  - Reliable Messaging Services - 70%
  - Started Security Messaging Services - 0%
  - With TA edited TRP section of Architecture Specification - 90%

## Transport, Routing & Packaging

- Deliverable by Tokyo
  - Packaging and Header Specification approved at Plenary
  - Reliable Messaging Services stable for use by POC by end of September
  - Security Messaging Services stable by use by POC by end of September
  - Sake
