

Schools Interoperability Framework Association (US)

“The Schools Interoperability Framework (SIF) is a non-profit membership organization comprised of over 100 software vendors, school districts, state departments of education and other organizations active in primary and secondary (K-12) markets, who have come together to create a set of rules and definitions to enable software programs from different companies to share information.”

“The goal of SIF is to make it possible for school administrators, teachers and other school personnel to have secure, appropriate access to the most current and accurate data available.”
